Friesens Inc Vol 2
March 2020

Introducing the New Friesen's Side Drive Spiral Conveyor with innovative technology that reduces the number of drives, improves efficiency, and decreases complexity resulting in more uptime and additional product throughput.

Developed in conjunction with Intralox, Friesen's brings this new technology to the industry with tried and true, robust, hygienic design.

January in Atlanta, Friesen's was represented on the FOSS booth with equipment showing our ability to integrate with inspection systems.

Friesen's was well received with many new projects on the horizon.

(Above) Perham, MN - February 8th - Friesen's held our annual "Employee Appreciation Party for 2019. The "Newbies" were asked to the stage to sing "Mary Had a Little Lamb" for a fun initiation.

(Upper Left) - Brett Friesen and Jason Green present the 2019 Salesman of the Year Award to Shane Peterson for his achievements and excellence in customer care.

(Left and Below) - Friesen's Team Members dressed in Horse Derby Gear for our themed celebration. Gifts could be won and earned through Derby Themed Games.

In partnership with our friends at Hormel and many other industry friends, we were able to raise \$7,400 toward "Plunging for Pink".

Plunging for Pink is an event of the "Paint the Town Pink Festival" in Austin, MN. This polar plunge event was started as a way to raise funds for cancer research, while creating a fun and creative winter activity that is wildly entertaining.

Feb 17 - Check out our Ad on Page 7 of Food And Beverage Tech Review for the Meat and Poultry Processing 2020 Special Edition.

Detroit Lake

Gaffney, SC - "We have enjoyed working with the Friesen's team on our most recent project expansion. Their use of 3D modeling allowed us to realize potential utility and clearance conflicts in the design phase so that we will be able to provide a seamless project implementation in a very narrow time frame." "

- Holland Belue

- Director of Facilities and Maintenance.
